EDUCATION

University at Buffalo, The State University of New York

Master of Science in Computer Science and Engineering, GPA: 3.55/4

Buffalo, USA

Aug 2024 - May 2026

WORK EXPERIENCE

Rocket Mortgage (Default Loan Servicing)

Software Engineer Intern

June 2026 - Present

- Built audit logging for loan decisioning workflows with C# and PostgreSQL, improving request/response traceability
- Developed an internal Next.js application that eliminated reliance on external API tools, streamlining loan evaluation workflows for underwriters

Rocket Mortgage (Default Loan Servicing)

Software Engineer Intern

May 2025 - Aug 2025

- Engineered high-scale .NET 8 REST APIs improving mortgage approval workflows, reducing escalations by 30%
- Upgraded AWS Lambda functions with Terraform, ensuring fault-tolerant deployments and certificate renewals
- Used SQL Server to design schemas, write queries, and optimize data operations aligned with compliance requirements.
- Leveraged Claude to accelerate unit test development and debugging, improving developer productivity and code quality.

Amdocs Ltd

Software Engineer

Jan 2024 - Jul 2024

- Collaborated within a Agile/Scrum team of 6 to enhance Ginger - an open source testing tool, using C# and WPF
- Optimized the web automation testing feature, reducing the test suite execution time by 60-90%
- Refactored legacy codebases applying SOLID and OOP design principles, improving developer experience
- Redesigned the OCR feature to enhance PDF readability, leading to a 40% improvement in text clarity
- Authored ~200 unit tests using MSTest framework for new and legacy features, achieving 90% code coverage
- Migrated LiteDB from version 4.1 to 5.0, enhancing data storage and retrieval efficiency while preventing file corruption

Amdocs Ltd

Associate Software Engineer

Jul 2022 - Dec 2023

- Built internal support web app using ASP.NET MVC, improving client collaboration and issue tracking
- Resolved around 3,000 defects and 300 critical bugs, significantly boosting software stability and user satisfaction
- Boosted test coverage by 60% using Selenium for advanced web component testing, enhancing UI stability and reliability

PROJECTS

LegitReach - [demo](#)

Feb 2026 - Present

Personalized newsletter for online sellers (NextJs, PostgreSQL(Supabase), Vercel)

- Engineered an AI recommendation engine that generates personalized Reddit engagement playbooks
- Built a secure credit-based system with Stripe, automating user quota management and real-time payment verification
- Developed a real-time push-based curation system with Redis, enabling background processing of CPU-intensive tasks
- Acquired 3 paying customers while iterating on AI features through direct customer feedback

ArtAtlas - [demo](#)

Dec 2025 - Jan 2025

Explainable Hybrid Art Search Engine (Python, PostgreSQL, pgvector, React)

- Built an end-to-end, explainable art search product that retrieves artworks and clearly shows why each result appears
- Developed a hybrid search system (keyword + semantic) with a deterministic concept layer to avoid black-box behavior
- Designed an evidence-backed explanation that attaches human-readable reasoning without impacting performance

Progression Palette - [demo](#)

Mar 2025 - Apr 2025

Emotion-Aware Music Generation System (Python, music21, Wikifonia)

- Built an interpretable music generation system that creates chord progressions based on emotional intent and theory
- Avoided black-box ML by using rule-based harmony and probabilistic sampling for controllable, varied outputs
- Designed an emotion-driven harmonic decoration layer that adjusts chord extensions in a musically explainable way

SKILLS

Programming: C#, JavaScript, TypeScript, Python

Libraries/Frameworks: .NET Framework, ReactJS, Node.js, Express.js, WPF, MSTest

Cloud & DevOps Tools: AWS Lambda, AWS RDS, Terraform, Azure DevOps, Git, GitHub

Development Tools & IDEs: Visual Studio, VS Code, Claude Code, GitHub Copilot, Codex

Database & Caching Systems: MongoDB, MS SQL, MySQL, PostgreSQL, Redis
